References and definitions:

Developmental Vulnerabilities: On each of the five Australian Early Development Census (AEDC) domains, children receive a score from 0 to 10 which is calculated based on teacher responses to the relevant domain questions for each child. AEDC results are reported as the number and proportion of children who are considered to be 'developmentally on track', 'developmentally at risk' and 'developmentally vulnerable' which is categorised based on cut-offs established using 2009 data. [Learn more here.](#)

Housing Stress: Housing stress is typically described as lower-income households that spend more than 30% of gross income on housing costs (ABS 2019). <https://www.aihw.gov.au/reports/australias-welfare/housing-affordability>

ROSH: Risk of Serious Harm -A child or young person is at risk of significant harm if the circumstances that are causing concern for the safety, welfare or wellbeing of the child or young person are present to a significant extent. [Learn more here.](#)

SEIFA: Socio-Economic Indexes for Areas (SEIFA) is a product developed by the ABS that ranks areas in Australia according to relative socio-economic advantage and disadvantage. Index of Relative Socio-Economic Advantage and Disadvantage (IRSAD) contains indicators of disadvantage as well as additional indicators of advantage. A lower score on the index means a *higher* level of disadvantage.

Sustainable Development Goals: United Nations 2030 Agenda for Sustainable Development. [Learn more here.](#)
